47 technology
partners

AI-powered
platform-based services

At every turning point in the IT revolution across business and society, infrastructure has been the foundation, enabling new models to emerge and thrive.

Internet:

Connectivity as a service

Connected the world, enabling instant communication and global collaboration.

Mobility:

Ubiquity as a service

Put information and services in the palm of our hands, transforming how we work and live.

Cloud:

IT as a service

Delivered scalable, flexible IT resources, making technology accessible as a utility.

Artificial Intelligence:

Agent as a service

Ushered in a new era of intelligent automation, data-driven insights and personalized experiences.

What we're hearing across the industry: Evolving client priorities in IT and asset management

Client needs

Guaranteed performance and reliability

Optimizing infrastructure

Achieving business outcomes

"I want to **Consolidate** my fragmented support across Countries / Vendors"

"I want **Visibility** of my license estate"

"I want to modernize my HW and SW with **Lifecycle management** services"

"Help me to generate the **value / ROI** through my purchased offers and features"

"I am unhappy with current **Partner skills and performance** – low responsiveness & technical expertise"

"I need to meet **Regulatory standards and compliance** reporting"

"I want **Preventative maintenance** (patching / security compliance)"

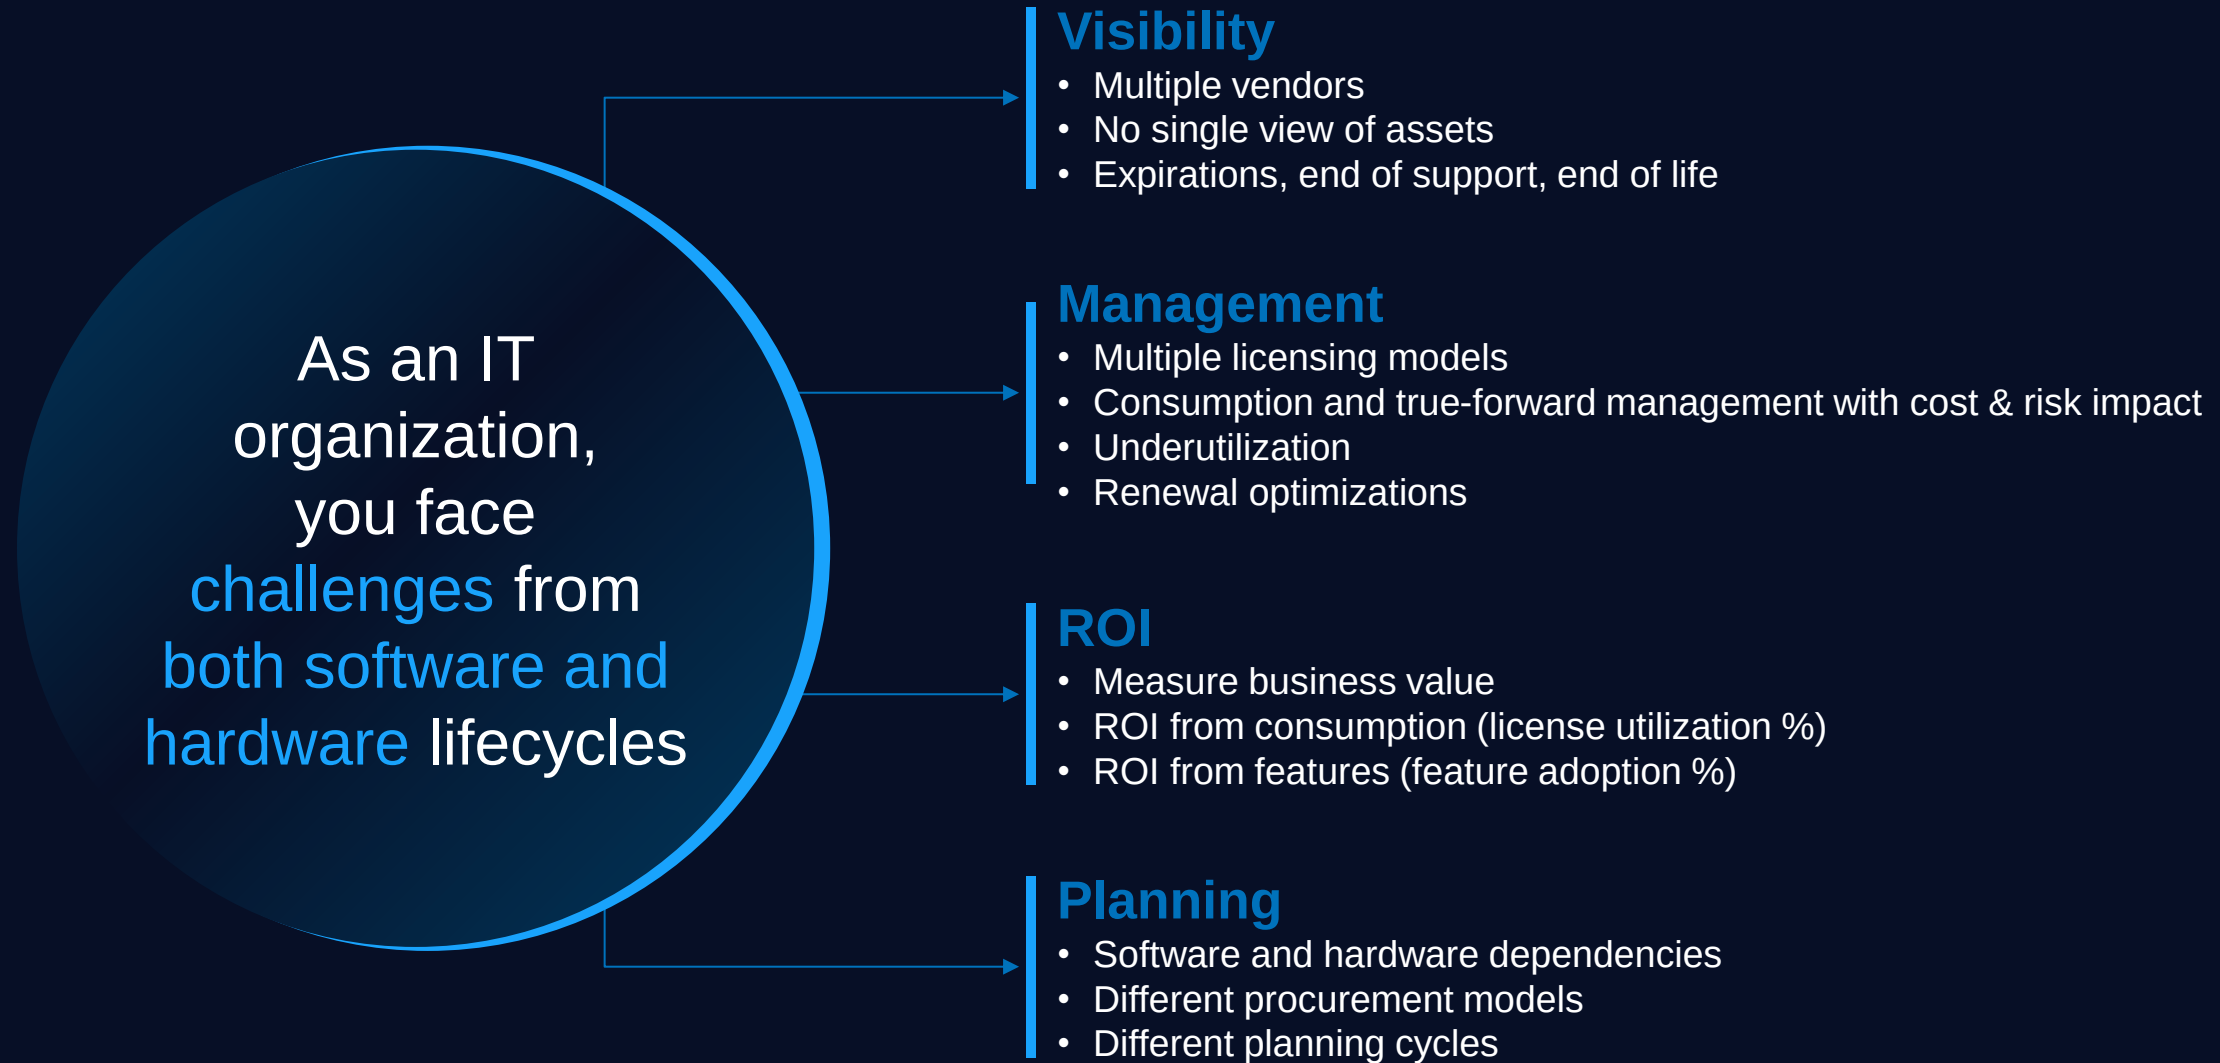

"I want to reduce **Costs**"

30% of software licenses go unused, representing a significant financial drain

Up to 25% of enterprise IT budgets wasted due to inefficient asset management

> 50% of organizations experience disruptions due to unexpected end-of-support for critical IT assets

Challenges at hand – you are not the only ones

NTT services portfolio is aimed at helping clients consume technology

NTT DATA's infrastructure services portfolio

Infrastructure Advisory

Empowering your business with informed technology decisions

AI has led to a full new suite of NTT Software Defined Infrastructure (SDI) Services

Cisco + NTT: AI Services stack joint value for our clients

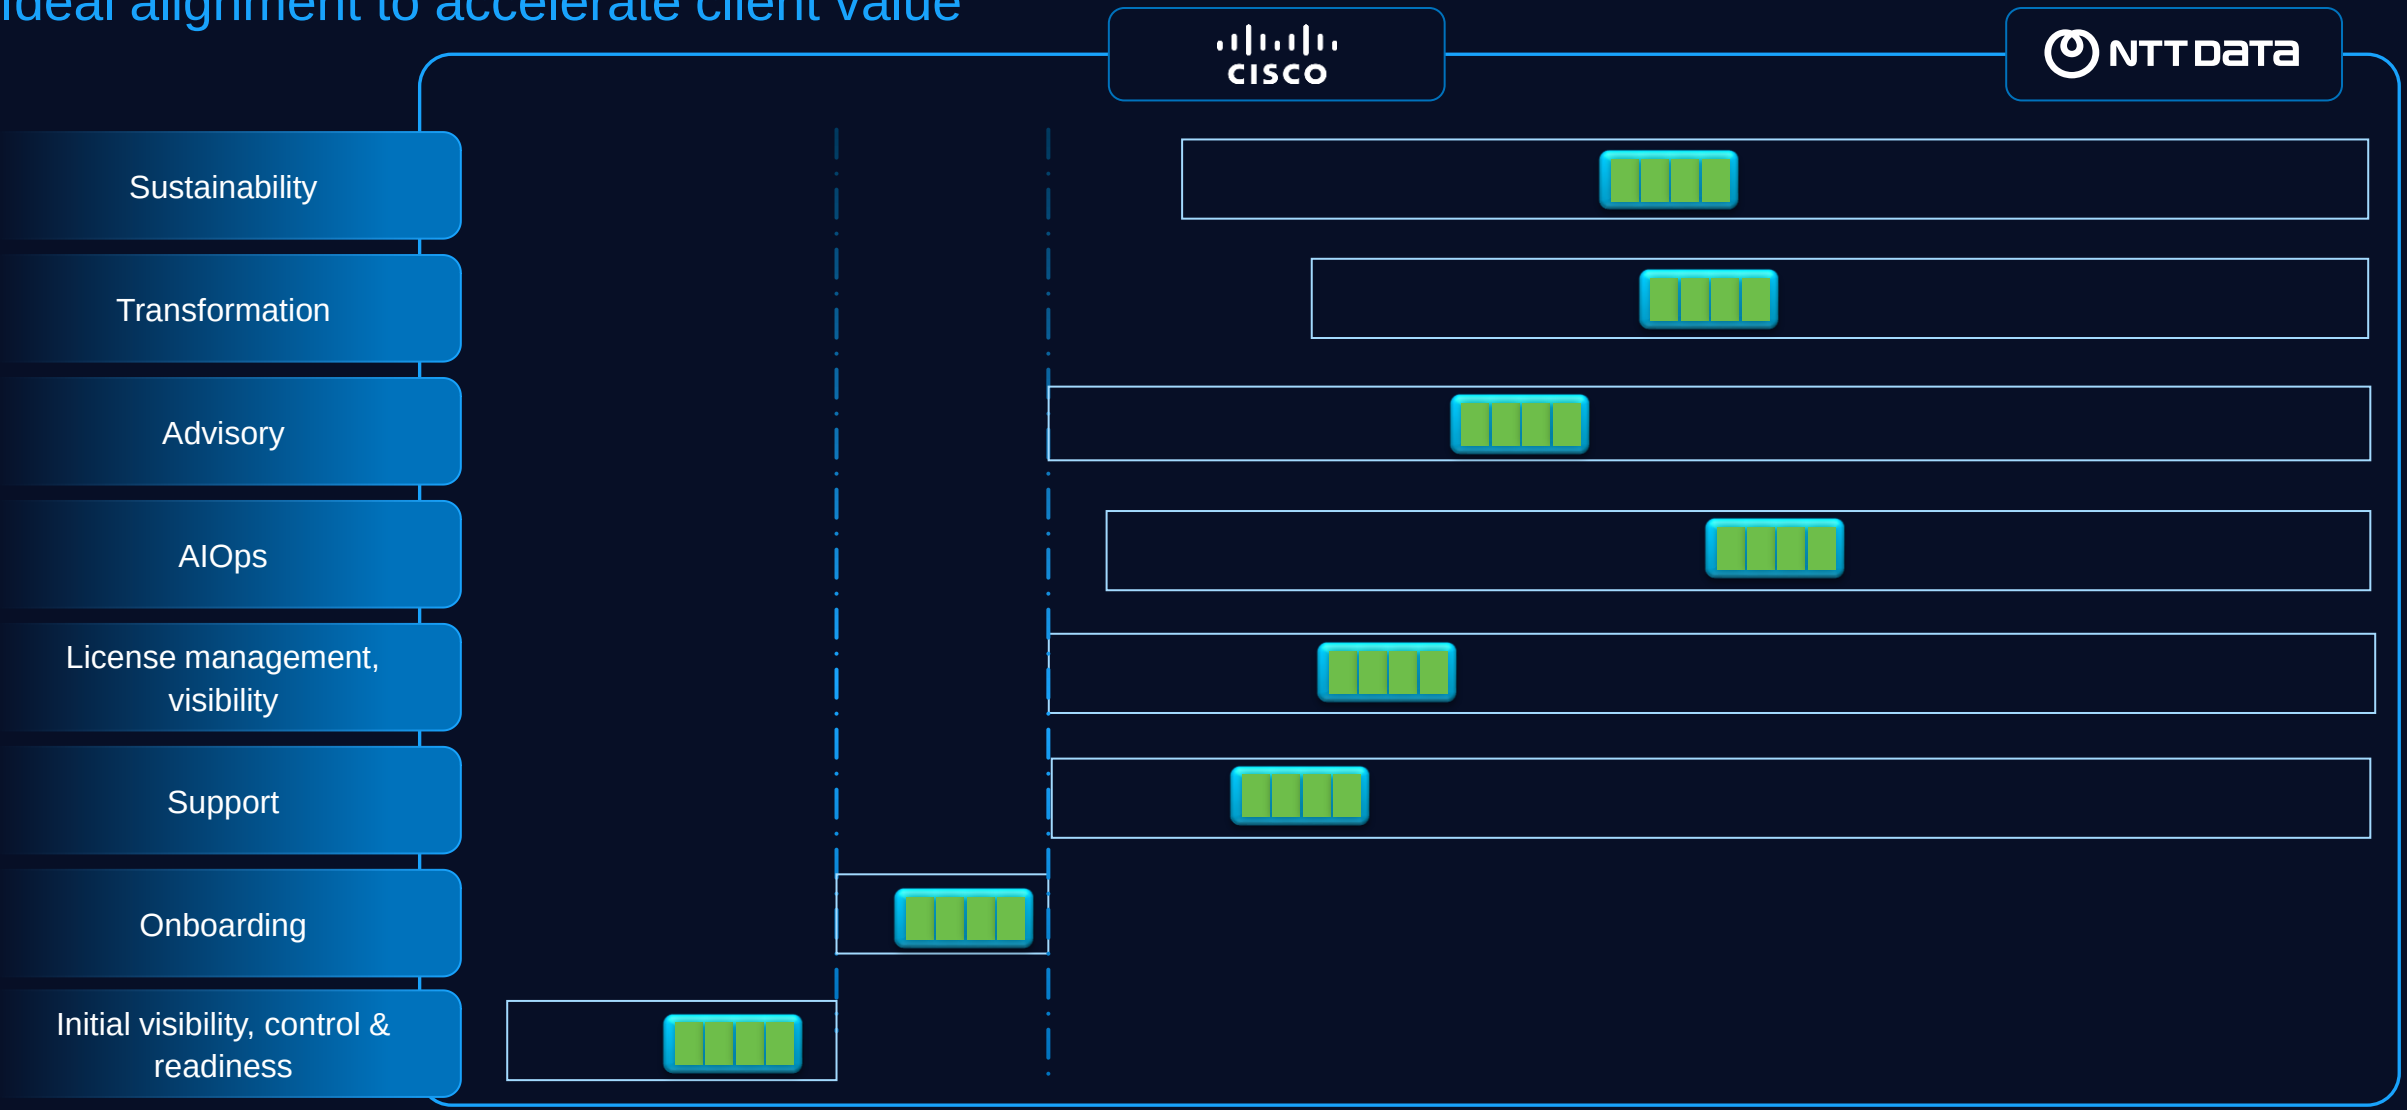

Ideal alignment to accelerate execution of Cisco & NTT DATA Services strategies

One Cisco + NTT: AI Services stack joint value for our clients

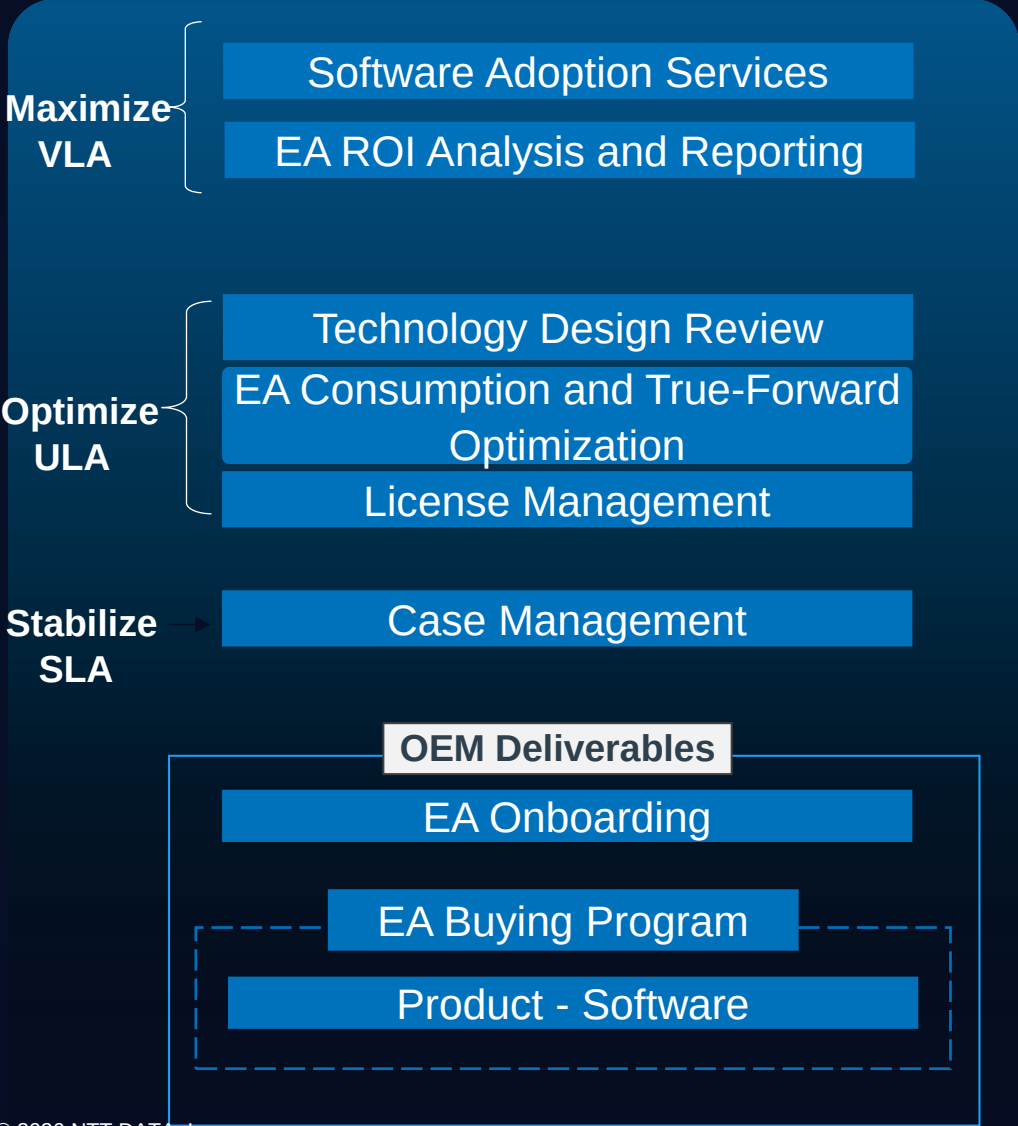

Ideal alignment to accelerate client value

NTT DATA One EA Services for Software

Our Offer

NTT DATA Deliverables across SLA, ULA and VLA

Software Adoption Services

- Identify eligible subscription use cases
- Conduct 1-1 sessions on the benefits by activating these use cases
- Implementation guidelines of these use cases – delivered through Quick start packages

EA ROI Analysis and Report

- Compare the EA Contract value and A-la-care equivalent of current license usage
- Derive ROI and publish in Services Portal

Technology Design Review

- Annual design workshops
- Recommendations on design best practices

EA Consumption Monitoring & True-forward optimization

- Quarterly review of True-forward usage
- Recommend optimization opportunities for cost savings during annual audit

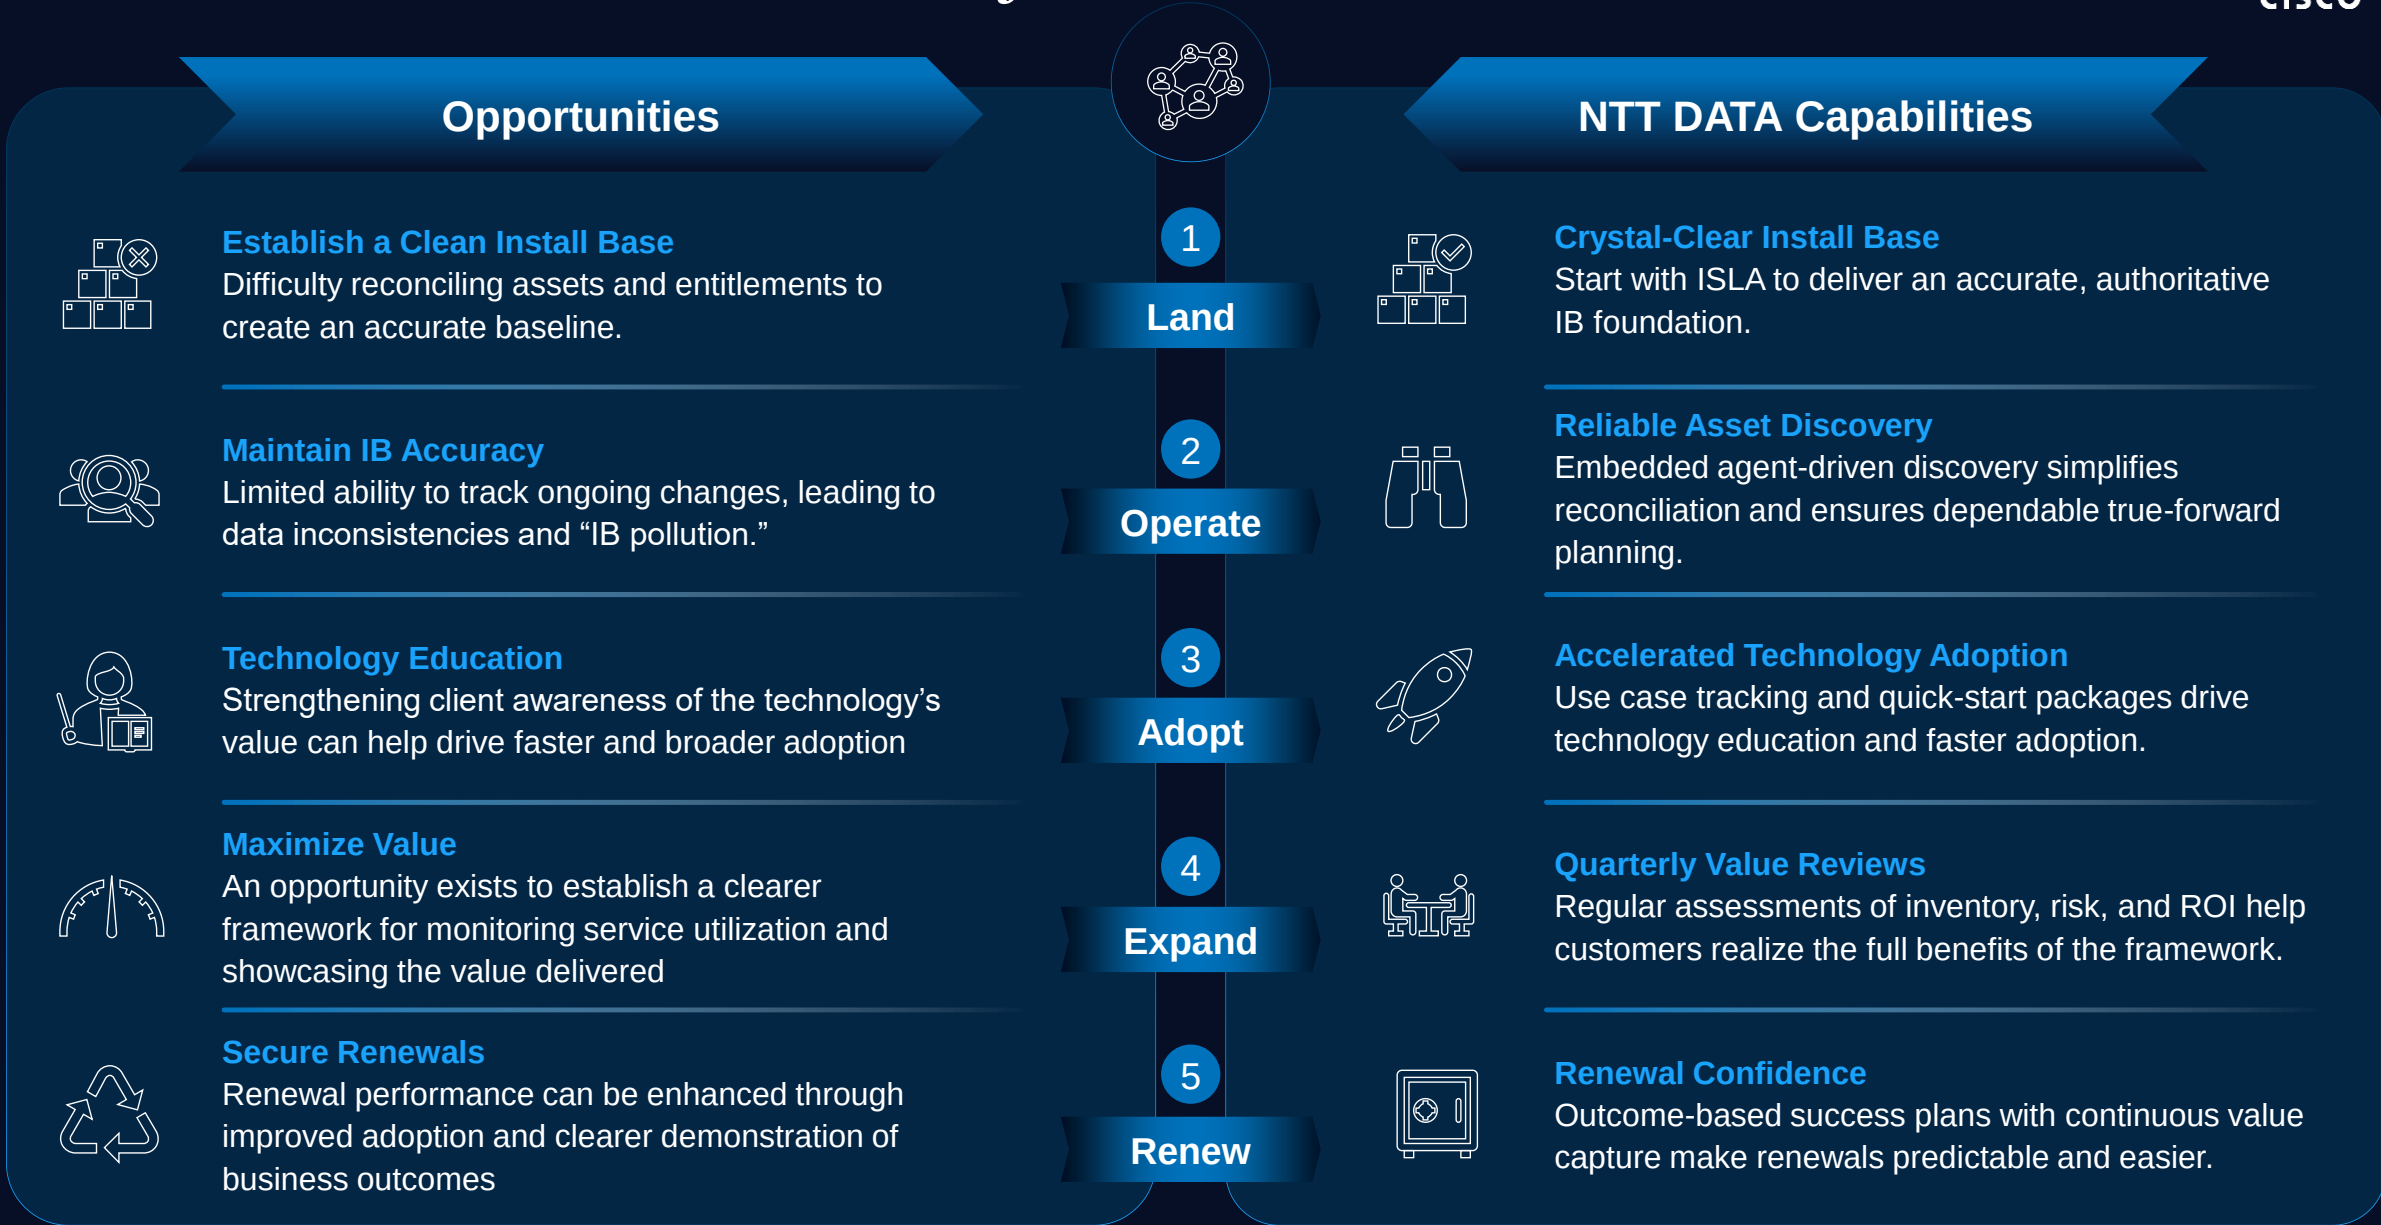

License Management

- Onboard all Smart Accounts to NTT DATA Digital Wallet with license usage, End of Subscription insights
- Quarterly recommendations to drive license adoption and optimization
- License administration

Case Management

- Single point of contact for cases related to Subscription Software

Cisco + NTT: AI Services stack joint value for our clients

Why NTT DATA & Cisco

Leverage our expertise, reach and unique capabilities

Strategic conversations leading to transformative multi-technology solutions, delivered as managed services under enterprise software agreements.

65% Fortune 100 serviced by NTT DATA network services and solutions

End to End IT Services portfolio

We offer a full stack of IT services, including strategic consulting, industry expertise, application development, cloud platforms, networking, cybersecurity, and managed services.

Suite of Cisco-powered services

We offer multiple Cisco Powered Services, enhancing our ability to address diverse client needs.

Software-defined Services

Software-defined infrastructure services to manage and operate software-defined networks

Integrated operations platform

Multi-tower services platform with APIs, automation, AIOps and analytics capabilities

Deep vertical knowledge

leveraging our strategic consulting services and leading technologies

Global reach, local delivery

Field engineering coverage in 145 countries
Support over 47 technologies in 14 languages

Multi-Tower approach

Our multi-tower approach resonates with clients' increasing preference for managed services and centralized software license management.

Technical depth

14,000 technical people covering the entire Cisco portfolio across all technologies

Named a Leader in the 2023

Gartner® Magic Quadrant™ for Network Services, Global, for the 10th consecutive year

Geographic breadth

Cisco's only true global partner with an even balance of bookings and capabilities across Cisco's 3 theaters.
