

From Five Minute Fixes to Months of Facepalms.

cisco Live !

Break the Silos with KPIs

Ayca Tiffany Ruppert
Solutions Development Architect – Automation

Webex App

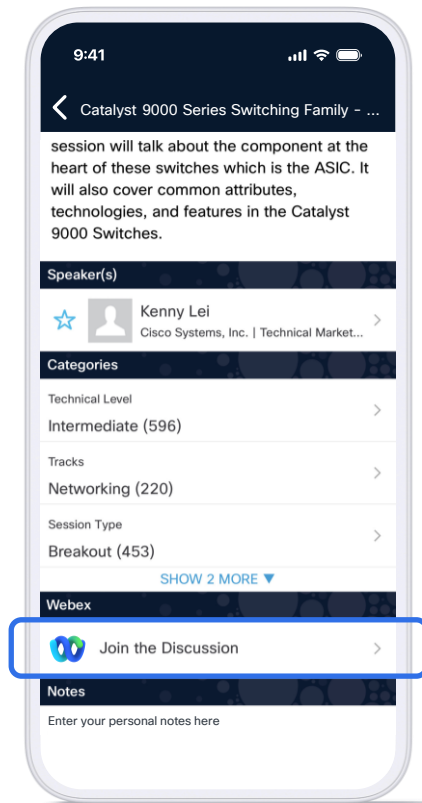

Questions?

Use Webex App to chat with the speaker after the session

How

- 1 Find this session in the Cisco Events App
- 2 Click “Join the Discussion”
- 3 Install the Webex App or go directly to the Webex space
- 4 Enter messages/questions in the Webex space

Webex spaces will be moderated by the speaker until February 27, 2026.

Ayça Tiffany Ruppert

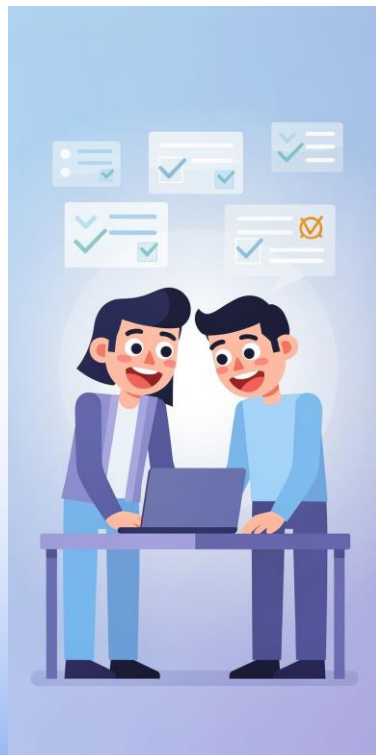

- Experience:** 19+ years as a Systems Engineer (spanning Enterprise Networking and Collaboration).
- Current Role:** Solution Development Architect for Automation at Cisco.
- Specialty:** A "passionate nerd" who has spent the last 5 years leading programmability and automation efforts for Cisco Germany.

Mission Statement:

Connecting the dots between technical stacks and real business value to help customers find their "path to possible."

“Cool – we fixed
this Problem in 5
Minutes”

An illustration split into two panels. The left panel shows a man and a woman smiling and working together on a laptop, with several floating icons of checkmarks and lists, representing a successful and organized workflow. The right panel shows the same man and woman looking stressed and confused while working on the laptop, with floating icons of question marks, error messages, and tangled arrows, representing a chaotic and problematic workflow.

[illegible]

Agenda

- 1 **Foundation: Automating the Infrastructure**
- 2 **Strategy: The Value Flow Map & KPI Definition**
- 3 **Application: Real-World Use Case**
- 4 **Q&A with Robert Kretschmer, Bayer AG**

Agenda

- 1 **Foundation: Automating the Infrastructure**
- 2 **Strategy: The Value Flow Map & KPI Definition**
- 3 **Application: Real-World Use Case**
- 4 **Q&A with Robert Kretschmer, Bayer AG**

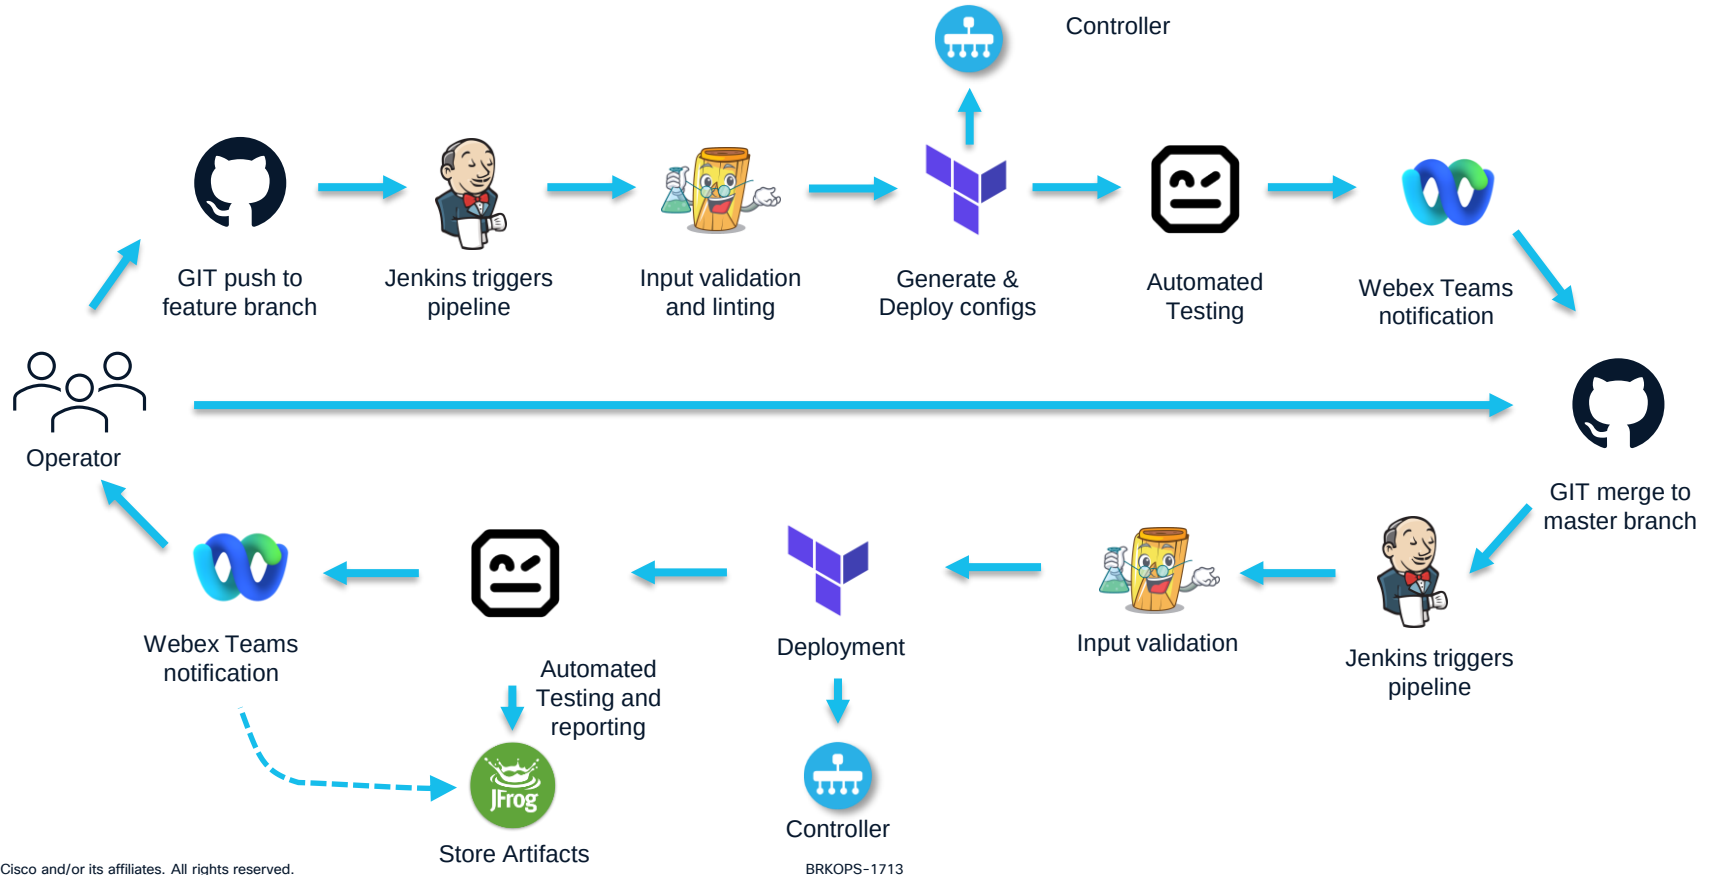

5 Minutes....Presentation done....right....RIGHT?!

Foundation: Automating the Infrastructure

Foundation: Automating the Infrastructure

Goal: Moving beyond manual setups to a programmable environment.

X as Code workflow

Foundation: Automating the Infrastructure

Goal: Moving beyond manual setups to a programmable environment.

Key Take aways:

- Selecting and installing the right automation toolsets.
- Best practices for infrastructure as code (IaC).
- Setting the stage for scalable, repeatable deployments.

Strategy: The Value Flow Map & KPI Definition

Strategy: The Value Flow Map & KPI Definition

Goal: Visualizing the end-to-end process to identify bottlenecks.

DevOps Metrics: Lets talk about DORA

It is a common trap in DevOps to focus entirely on the "how" (automation tools) while ignoring the "how well" (metrics). To move from "isolated automation" to "successful DevOps," you need metrics that measure also the **entire value stream**.

The DORA Metrics (The Gold Standard)

Developed by the DevOps Research and Assessment (DORA) group, these four metrics are the industry standard for measuring the balance between **speed** and **stability**.

Deployment Frequency:

How often does your organization successfully release to production?

(Measures speed/agility).

Lead Time for Changes:

How long does it take for a commit to get into production?

(Measures the efficiency of your pipeline).

Change Failure Rate:

What percentage of changes to production result in a degraded service or require a rollback?

(Measures quality).

Time to Restore Service (MTTR):

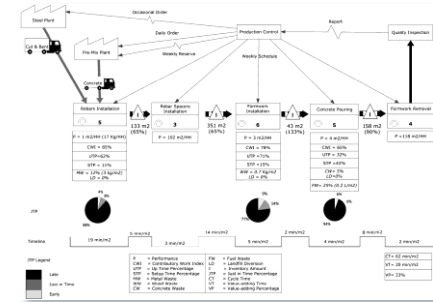

How long does it generally take to restore service when a primary service incident occurs?

(Measures resilience).

How to visualize the effect from automation (flow) and visualization (feedback) architectures?

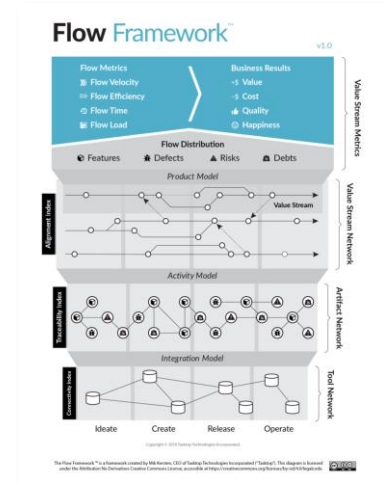

Value Stream Mapping (VSM) *lean tool that employs a flowchart documenting every step in the process*

- Proven and commonly used in the industry
- Provide a detailed view of the flow of material and information and identifies "waste"

The Flow Framework *track the flow of business value in software delivery, in a way that both the software delivery organization and the business can understand*

- Connects business-level frameworks and transformation initiatives to technical architecture
- Bridge the GAP and bring DevOps/Agile to the business

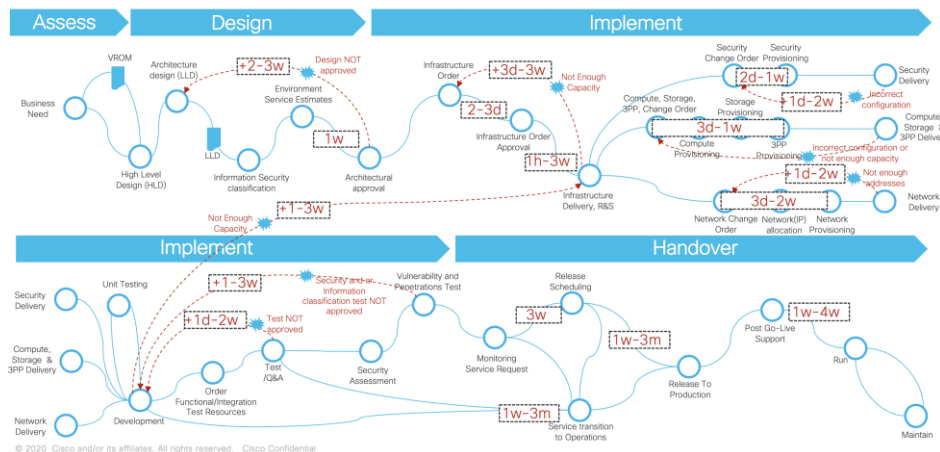

Simple Value Flow Mapping

Value Flow Mapping(VFM)

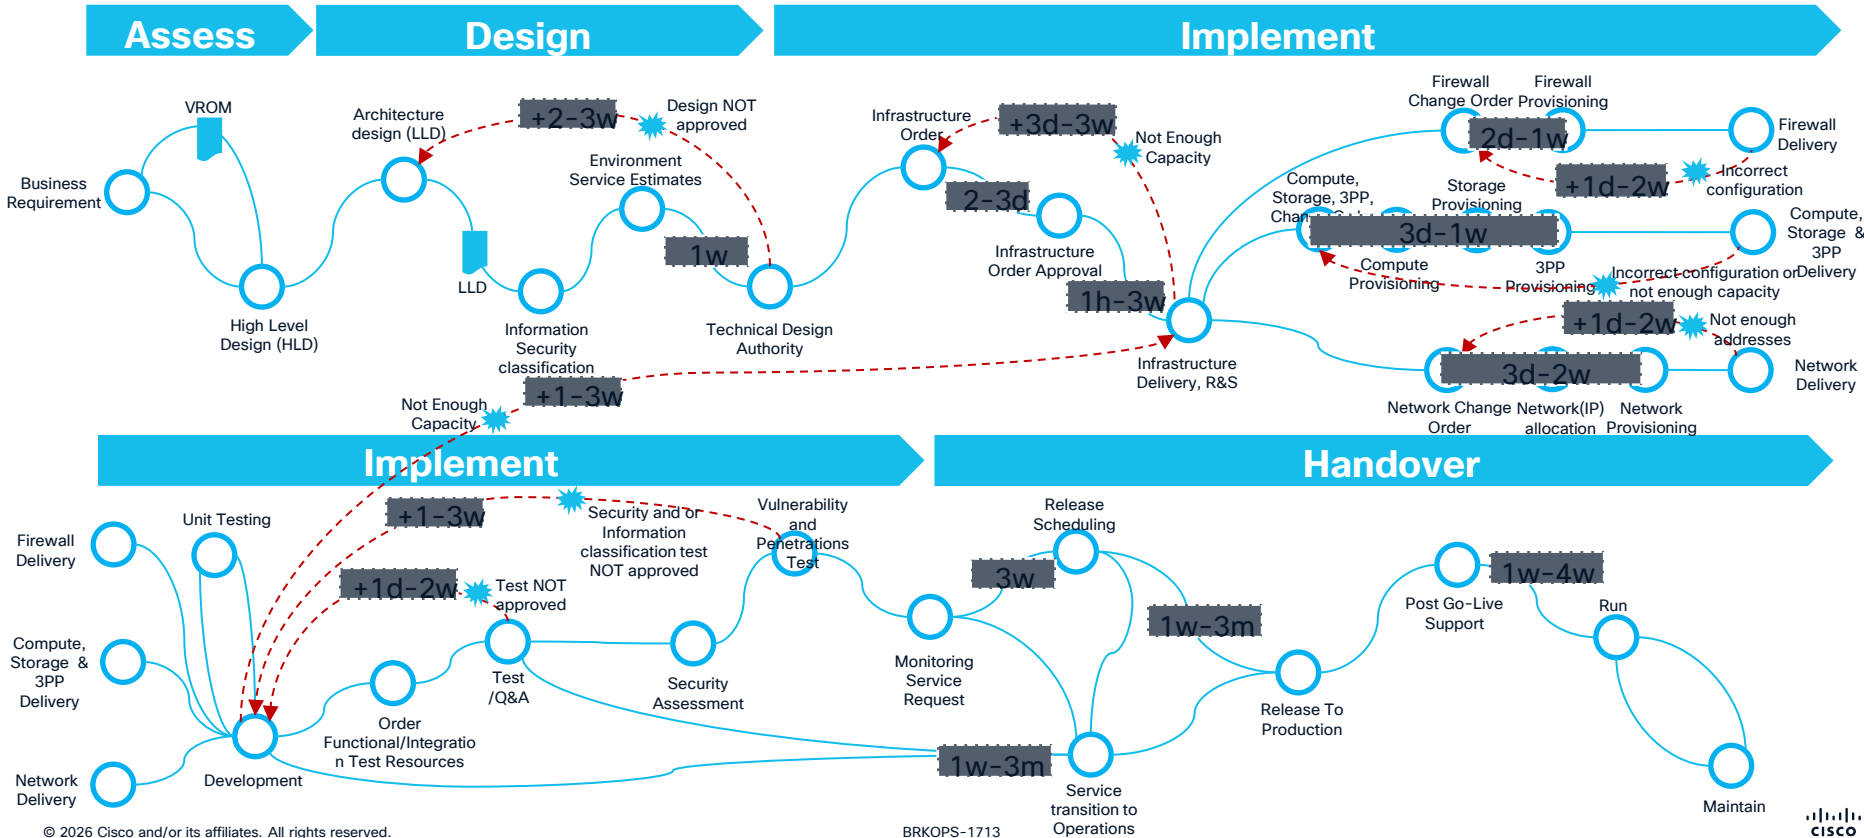

Real world inspired visualization of Flow and constraints of the main type of IT Work (Business Projects)

- Simple an intuitive visualization of flow and constraints
- Minimal time required for data collection
- Business Value can directly be connected to initiative addressing technical debt and advanced monitoring capabilities

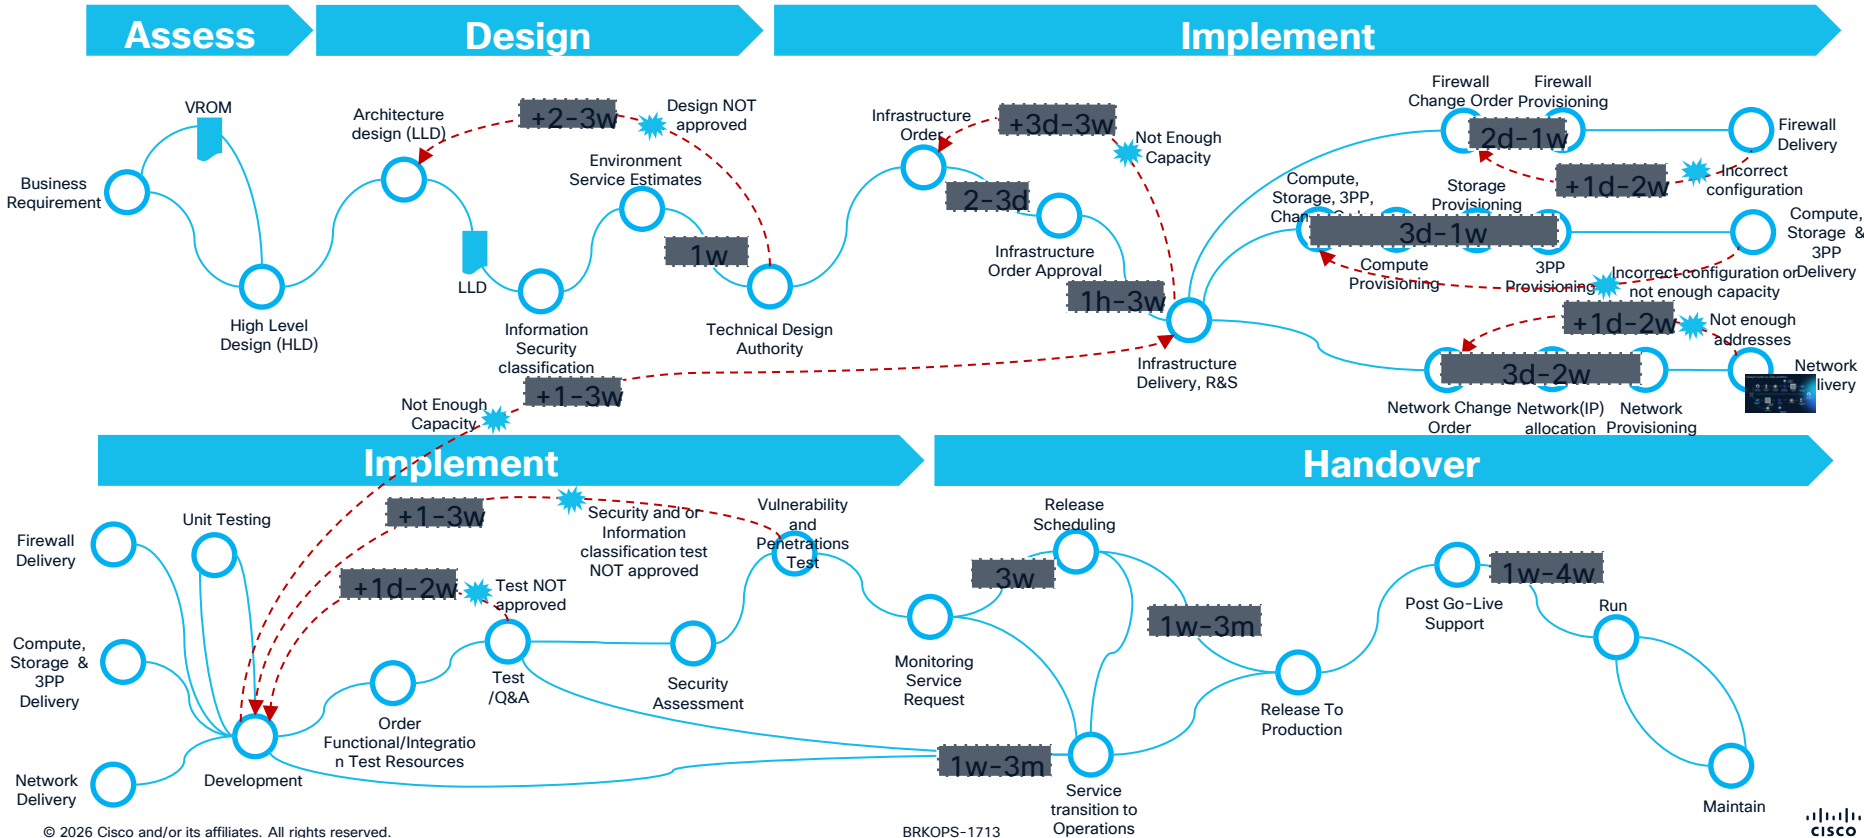

As we developers do, we get inspired by others ☺ credits to Thomas Brandstroem ☺

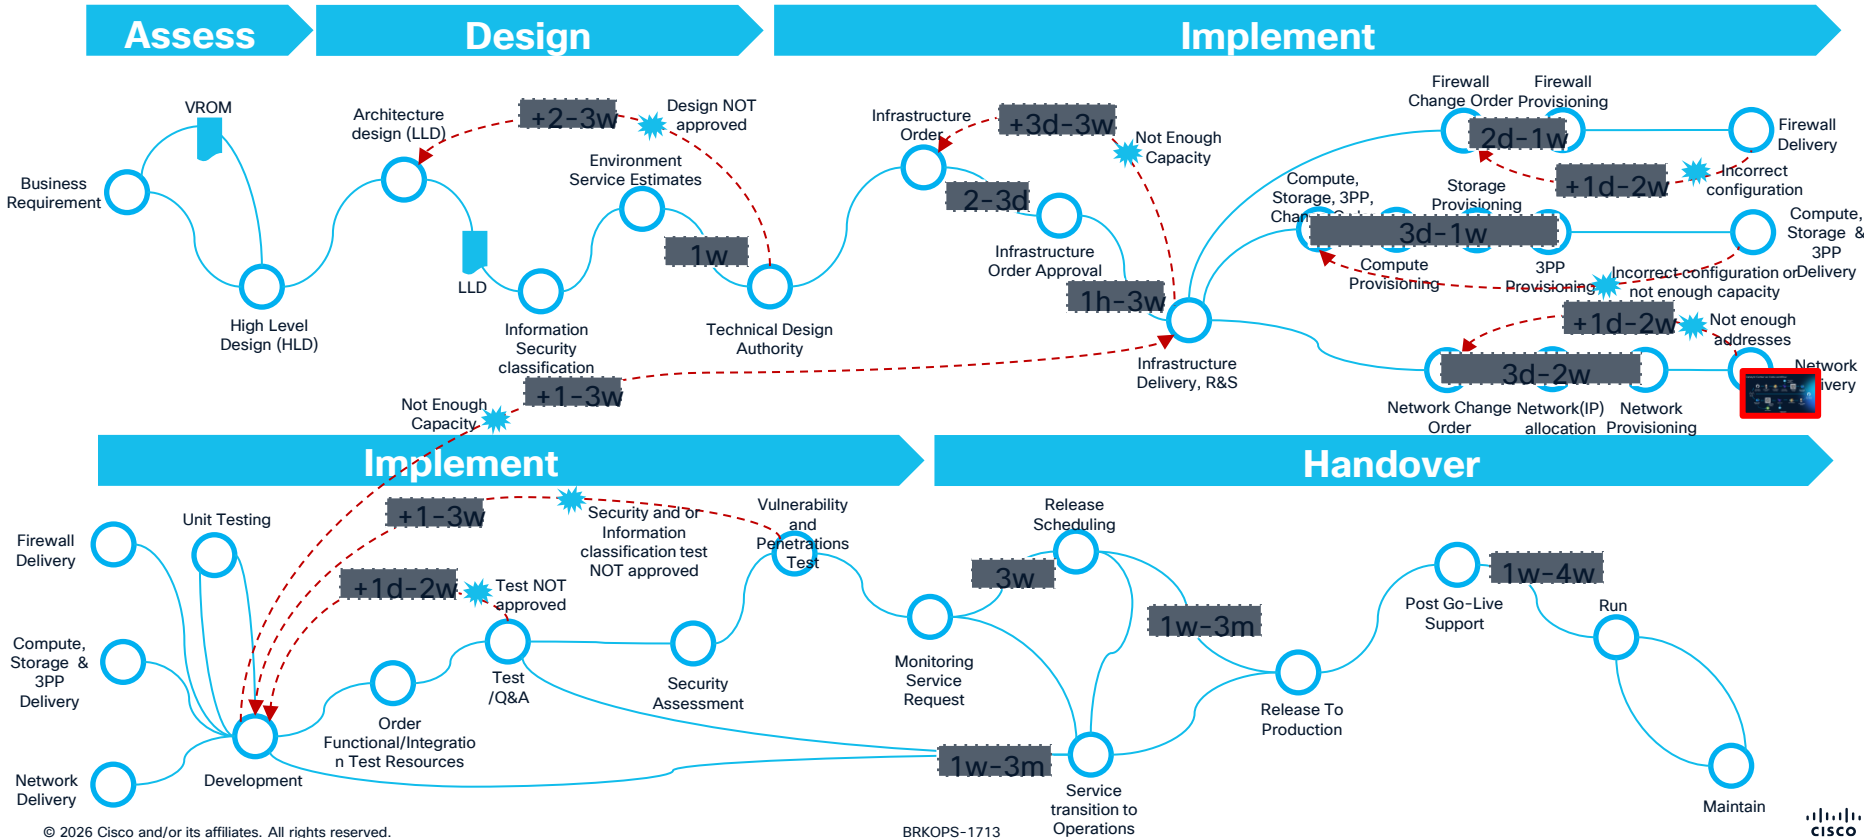

As-Is Value Flow Map

To-Be Value Flow Map

EXAMPLE

-6 weeks = 40% lead time reduction

-----> rework
-----> feedback work

Strategy: The Value Flow Map & KPI Definition

Goal: Visualizing the end-to-end process to identify bottlenecks.

Key Take aways:

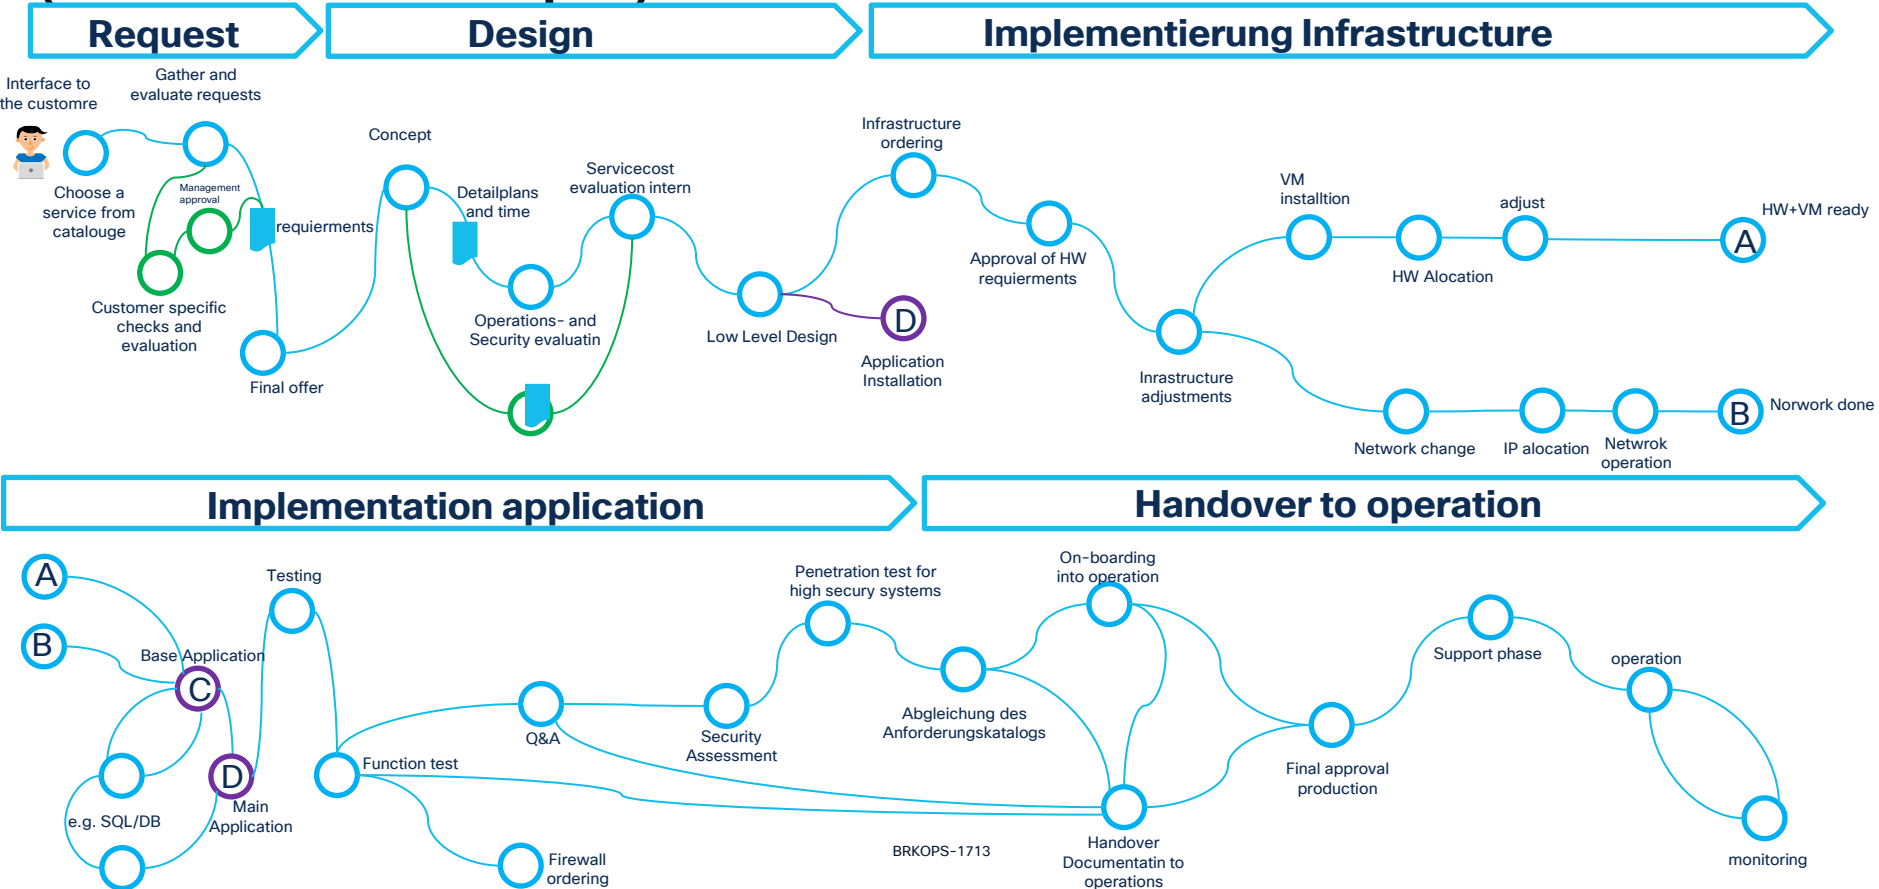

- Introduction to Value Flow Mapping: How to see the "whole" instead of the "parts."
- Methodology for defining KPIs that reflect the entire delivery lifecycle.
- Moving from technical metrics (speed of a single task) to business-aligned metrics (time to value).

Application: Real-World Use Case

Application: Real-World Use Case

- **Goal:** Demonstrating theory in practice.

As-Is Value Flow Map

As-Is Value Flow Map

Application: Real-World Use Case

- **Goal:** Demonstrating theory in practice.

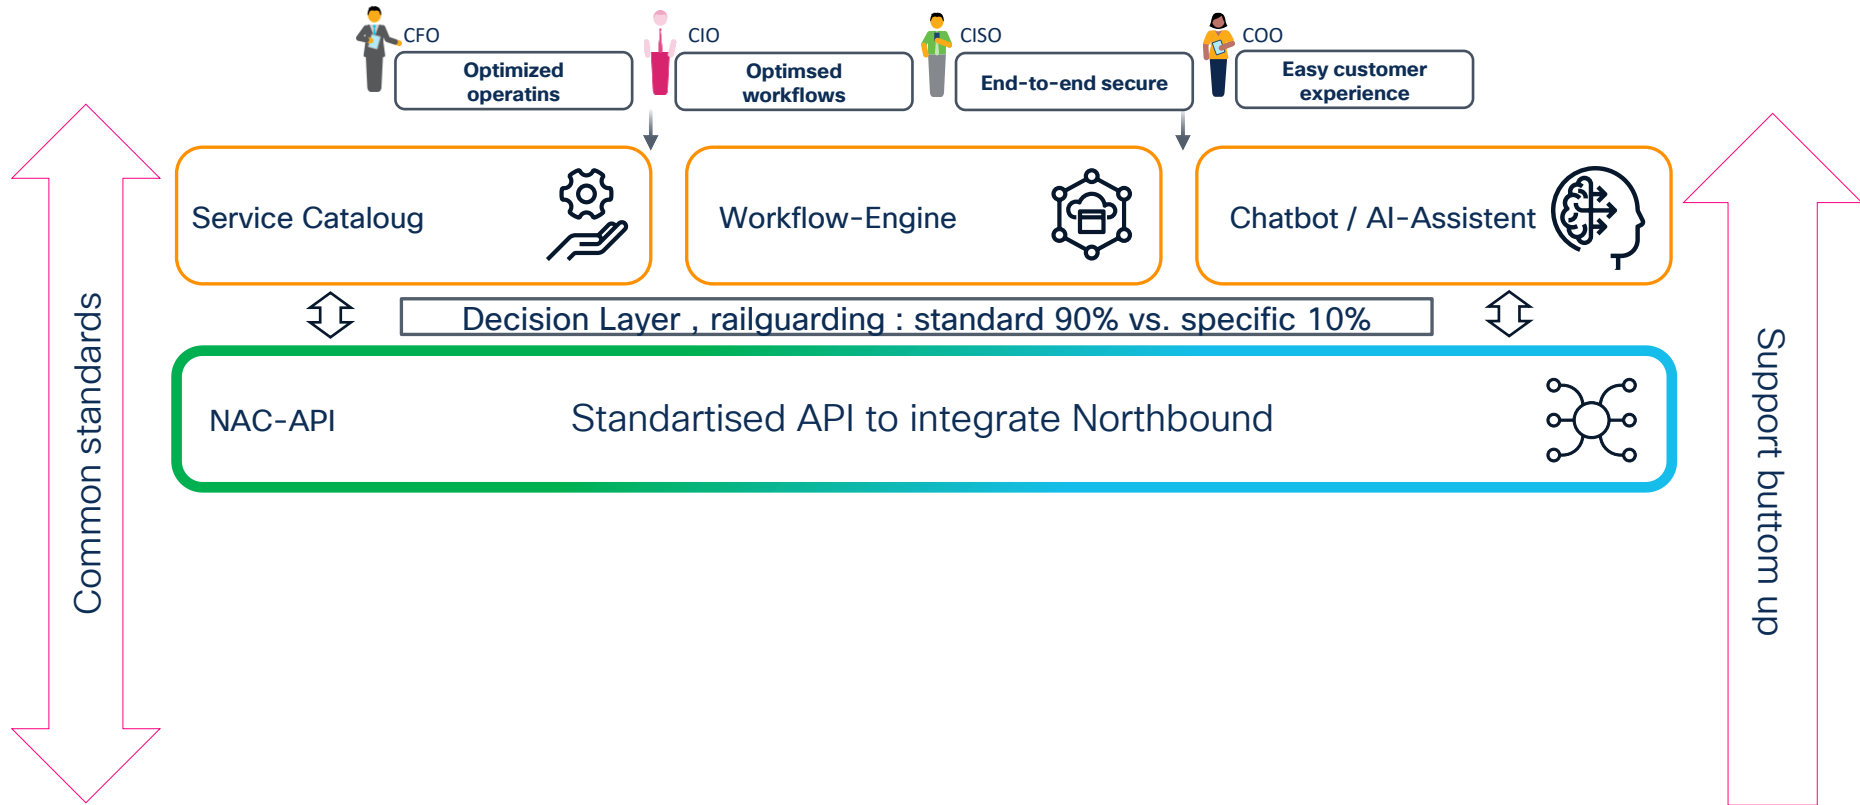

- **Key Topics:**

- Identifying break points in a real-world environment.
- Bridging silos using API catalogues and cross-domain DevOps teams.
- The impact of connected automation on customer delivery timelines.

Q&A with Robert Kretschmer, Bayer AG

Head of Connectivity Platform

Conclusion

From Isolated Scripts to **Integrated Value**

Automation is the engine, but the **Value Flow Map** is your GPS.

measuring the **entire journey** through business-aligned KPIs, we transform technical scripts into real-world impact.

Let's stop just 'doing automation' and start accelerating the path to possible."

Complete your session surveys

Complete your surveys in the Cisco Events App.

Complete a minimum of 4 session surveys and the overall event survey to receive a unique Cisco Live t-shirt.
(from 11:30 on Thursday, while supplies last)

Continue your education

Visit the Cisco Showcase for related demos

Book your one-on-one Meet the Engineer meeting

Visit the Technical Solutions Clinics to discuss your technical questions

Attend the interactive education with DevNet, Capture the Flag, and Walk-in Labs

Visit the On-Demand Library for more sessions at CiscoLive.com/On-Demand

Thank you

cisco Live !
